

DHRUV KUMAR

Mob: +91-9058015111 | E-Mail: dhruvkumar010200@gmail.com | [LinkedIn](#) | [GitHub](#) | [Gurgaon, HR](#)

Summary

Data Analyst with hands-on expertise in **GenAI**, **NLP**, and **Machine Learning**, skilled in building **predictive models**, interactive dashboards, and end-to-end data analysis. Experienced in cross-functional collaboration and delivering actionable insights to support business decision-making.

Skills

- **IDE** : Jupyter Notebook, MySQL Workbench
- **Python** : Numpy, Pandas, Seaborn, Matplotlib, Scikit-Learn
- **SQL** : DDL, DML and DQL Commands in RDBMS
- **Exploratory data analysis** : Data understanding, data cleaning, and data preprocessing
- **Machine Learning Algorithm** : Regression, Classification, Tree-Based models & Cross-Validation, Ensemble, Agglomerative Clustering and PCA
- **Statistics**: Descriptive & Inferential statistics
- **Gen AI** : Gen AI Prompting and Gen AI-RAG
- **Tableau, Power BI, AWS**
- **Advanced Excel, Problem-Solving**

Academic Projects

Find Your Next Movie- Recommendation Platform | *NLP, Word2Vec, REST APIs, Scikit-Learn* [App link](#)

- Designed and deployed an interactive, end-to-end movie discovery application leveraging advanced natural language processing to generate semantic and syntactic content recommendations.
- Built a recommendation engine using Word2Vec and CountVectorizer for semantic and genre-based movie recommendations.
- Integrated TMDb REST API for real-time movie metadata and optimized application performance using caching techniques.

Emotion Classification | *Logistic Regression, SVM, Multinomial Naive Bayes, XGBoost, BERT, NLP*

- Built a multi-class emotion classification system using NLP techniques including TF-IDF, Logistic Regression, SVM, and BERT to automatically detect and categorize emotions from raw text data.
- Achieved 85% classification accuracy on a labelled emotion dataset, demonstrating strong model performance across multiple emotion categories.

AI-Assisted Structural Defect Report Generator | *Streamlit, Prompt Engineering, GenAI* [App link](#)

- Designed and developed an end-to-end GenAI-powered application that automates the generation of professional structural defect assessment reports using prompt engineering and large language models.
- Delivered a fully functional client-ready tool that produces detailed reports covering defect severity, impact evaluation, remediation strategies, cost estimates, and preventive recommendations - reducing manual reporting effort significantly.

Experience

OLA Electric Technology PVT. LTD.

Jan 2022- Mar 2025

MIS Executive

Jaipur, Rajasthan

- Optimized vehicle dispatch planning, reducing logistics costs and time by 10% through process efficiency improvements.
- Enhanced workforce retention and operational efficiency by 25% through comprehensive worker management and engagement initiatives.
- Leveraged advanced Excel and automated reporting dashboards to track real-time logistics analytics, reducing dispatch anomalies.

Education

Course	Institute	Year	Score
Masters in Data Science	Manipal University Jaipur	Apr 2023 – Aug 2025	82%
B.Tech in Electrical Engineering	GLA University, Mathura	Apr 2018 – Mar 2022	70.4%
12th	PDDSV, Vrindavan	2017 – 2018	69%

Extra-curricular/Achievements

- Earned HackerRank Advanced SQL Certification, demonstrating expertise in complex SQL concepts including joins, window functions, CTEs, subqueries, and query optimization.
- Ranked among top-tier participants in Kaggle's House Prices: Advanced Regression Techniques competition, achieving a validated 0.13695 RMSE score.
- Achieved a verified 0.77672 accuracy score on Kaggle's Titanic Benchmark utilizing advanced feature engineering and data preprocessing.
